Seeking the following skills:
About: Neuro Rehab VR develops virtual reality training exercises to help aid and expedite neurological physical therapy recovery by leveraging breakthroughs in neuroplasticity. The VR exercises are designed with the help of physical therapists and customized for each patient’s needs and targeted therapy plan with the ability to measure, quantify, and track progress with real-time data feedback.

As a **VR Software Developer** on our team, you will be working on designing and implementing the software architecture and framework for the Virtual Reality (VR) and simulations system. You will be creating and prototyping novel VR, augmented reality experiences and games for patients and other clients of the company.

**Responsibilities include:**
- Develop VR/AR games for therapy
- Develop user interface and experiences
- Design games and simulations based on inputs from physical therapists and according to the therapy being provided
- Manage database and cloud systems for seamless storage and integration of the projects developed
- Work closely with the other members of the team to iterate and develop projects according to the feedback provided

**Basic qualifications**
- Bachelor’s degree in Computer Science or equivalent experience
- Strong computer science fundamentals in algorithms, object-oriented design and data structures
- Experience with using the Unity3D game engine with 3D game development and optimization
- Experience building applications for the HTC Vive, Oculus Rift, and other VR headsets
- Fluent in programming languages like C++, C# and JavaScript

**Preferred qualifications**
- PhD or Master’s in Computer Science, Game Design or equivalent experience
- Experience in building for Augmented reality headsets like Hololens, Meta etc
- Mobile game and application development experience for iOS and Android phones

Send applications and resume to: info@neurorehabvr.com

**MARKETING AND EVENT MANAGER – Dallas Chapter**
VR/AR Association is the global industry association for Virtual Reality & Augmented Reality, connecting leading solution providers with brands and customers.
As a Marketing and Event Coordinator, your primary responsibility is to execute marketing initiatives, coordinate and manage monthly event for the VR/AR Association in Dallas. Daily activities include identifying VR/AR trends and solutions, implementing marketing programs to increase the chapter exposure, and keeping detail records of all potential leads and companies. The Marketing Coordinator will also monitor and communicate market / industry trends, consumer feedback, and adjust the campaigns accordingly with the team.

- Responsible for execution of daily tasks including social media posts and obtaining leads in the VR/AR
- Collaborate with cross-functional teams to map territory, game plan, and launch marketing plans
- Provide ongoing market evaluation through direct consumer contact, follow ups, and monitoring industry trends
- Co-ordinate and manage monthly events including contacting prominent leaders in the VR/AR industry

Qualifications:
- College degree in Business Administration or Marketing is preferred, but all majors will be considered given a sincere interest in marketing.
- Work history including internships and co-ops are a plus in related fields.
- Self-motivated, proven leader
- Excellent communication skills
- Interest and market knowledge of the VR/AR landscape is preferred

Send applications and resume to: veena@thevrara.com

Job/Internship Opportunity
As an AR Software Developer on our team you will be working on designing and implementing the software architecture and framework for the Augmented Reality (AR) work instructions system. You will be creating and rapid prototyping Android apps using Vuforia or ARCore SDKs in Unity game engine

Responsibilities include:
- Develop VR/AR android applications
- Develop a seamless user interface and touch interactions
- Design a framework for developing AR training and simulations for industrial 3D models
- Manage database and cloud systems for seamless storage and integration of the projects developed
- Work with high polygon models and optimize it for Unity
- Work closely with the other members of the team to iterate and develop projects according to the feedback provided

Basic qualifications
- Bachelor’s degree in Computer Science or equivalent experience
- Strong computer science fundamentals in algorithms, object-oriented design and data structures
- Experience with using the Unity3D game engine with 3D game development and optimization
- Experience building applications for the HTC Vive, Oculus Rift and or other AR headsets
- Fluent in programming languages like C#, JavaScript, Python

Preferred qualifications
- PhD or Masters in Computer Science, Game Design or equivalent experience
- Experience in building for Augmented reality headsets like Hololens, Meta etc
- Mobile game and application development experience for iOS and Android phones

Send applications and resume to: jobs@futuresight-ar.com

---

**ParkHub**

About: ParkHub is a technology company that is changing the world, one parking experience at a time. We currently have several products in the market and will be adding more in the coming months and years as we sprint through the first of many rapid growth stages.
As you can imagine, this type of success is simultaneously thrilling and challenging. Our ideal candidate should thrive in this kind of fast-paced environment while also being flexible enough to handle change and grow with the role. We are truly team players - one of our core values is that “no one is above any job” and we really do mean that.

**ParkHub Full Stack Developer Intern**

Who We Are Looking For:
An extraordinary and energetic Full Stack Developer Intern who is seeking to gain valuable knowledge of:

1. The unique business of Software as a Service (SaaS) and Hardware as a Service (HaaS) products in an ever changing industry
2. What it’s like to work within an impactful agile startup development team using the latest web technologies.

This position includes supporting existing development projects, bug-fixing application issues, routine data management tasks, and assisting with cross-departmental projects. Our Full Stack Developer intern will also be mentored by one of our senior developers on an individual project that gives them the opportunity to apply their skills and learnings on a product with major stakeholder visibility. The applicant needs to be a flexible, self-motivated, and an active learner who is ready to embrace the exciting challenges that a rapidly-growing product set offers. Preference is given for students enrolled in Computer Science or related majors able to work ~20 hours per week, both in and out of the office. Start and end dates are flexible.

Why Work For Us?
The goal of this internship is to develop valuable, relevant experience in a remarkably unique and innovative environment. The Full Stack Developer Intern will become a vital member of the development team who is personally involved in major company initiatives that can be used to leverage their experiences with ParkHub when they seek full-time professional positions.

Skills We Are Looking For:

- Eagerness to learn about new technologies
- Previous development experience in any context
- High flexibility and adaptability when presented with new challenges
- Proven ability to demonstrate good judgement and professionalism
- Ability to manage their time effectively and work independently
- Ability to collaborate within a dynamic, open, and driven team
- Preferred candidates will be working towards BA/BS or advanced MS degree in a relevant technical discipline
- Interest in a career in frontend, backend, or full stack development

What You Will Do:

- Develop features to advance and improve our existing product offerings
- Individually build a product to be used internally or externally that will stretch your growing skill set
- Assist with ongoing maintenance and feature development for our existing product set
- Bug-fixing and QA of products, features, and fixes that are in, or are headed to, a production environment
- Facilitate data reporting requests as requested by our other teams and stakeholders

Benefits and Perks:

- Paid Internship
• Partly Remote
• Unlimited coffee, Topo Chico, and a stocked kitchen with snacks on snacks on snacks
• Open office environment
• We’re dog friendly
• Monthly team outings
• Partner perks (game tickets, pre-sale access, swag)

• Citation for resources
• Lesson Plan for the teacher
• Anything that we couldn’t explain to the students using video’s or slides.
• Parent email outline - what was learnt (Objective), classwork, Homework, Quiz and next class(Objective)

About: Imagine this: Your toddler is sick with what you guess might be a cold, but it could very well be something more serious. Your only choices are (1) to risk it and try a home remedy, (2) to schedule the next available appointment with your doctor – which could be days or weeks out, or (3) to go to an urgent care clinic or an emergency room and pay their exorbitant fees. In any scenario, someone suffers, either you or your toddler.

Now imagine an alternate reality with TrivTech Dx: Your toddler is sick. You use the TrivTech Dx
smartphone app and input the symptoms. The app guides you to purchase an over-the-counter TrivTech Dx Influenza test from the local pharmacy. You drive down to the pharmacy and pick up the test cartridge. You swab your toddler’s nose, put the cartridge into your TrivTech Dx test instrument and start the test. In less than 30 minutes, the app informs you that Influenza A viral RNA was detected and the test is positive. You send the test data to your doctor wirelessly, through the cloud. Your doctor verifies the test result and sends over a prescription for your toddler to treat his Flu. In the span of 1 hour and for about $50, you’ve diagnosed and treated your toddler. This is the future we are working hard to create at TrivTech Dx.

Research & Development
We seek to hire a multi-talented Biomedical Engineering graduate student (or similar background) to support the TrivTech R&D effort, by working with a team to design and develop the company’s point of care diagnostic platform.

The role entails significant interdisciplinary responsibility, with the focus of the work dedicated towards nucleic acid and protein assay development. The candidate’s broad portfolio of skills should allow the candidate to take ownership of multiple complimentary development tasks spanning microbiology and engineering. The right candidate will demonstrate innate capacity to quickly learn new concepts and simultaneously execute multiple complex experiments and tasks to aid the R&D team’s overall technical goals.

Experience in managing relationships with external service providers and partners will also greatly aid the candidate, as will an aptitude for problem solving industry-level challenges with creative yet commercially viable solutions.

The successful candidate must be able to work closely with team members having a variety of technical backgrounds to overcome ever-evolving challenges, whilst maintaining focus on the Company’s commercial objectives. The Intern must draw upon a strong research background and experience to contribute a strong empirical design capacity to the TrivTech R&D team.

**Key Roles & Responsibilities:**
- To be a laboratory-based engineer, within the R&D team located in Dallas, TX.
- To utilize in-depth knowledge of microbiological techniques, including sample culturing & analysis, nucleic acid sample preparation, nucleic acid amplification, and quantitative sample characterization, to support and optimize the R&D team’s efforts.
- To utilize 3D CAD design and prototyping techniques, including 3D printing, to support the R&D team.
- To maintain and establish working relationships with a number of external partners, service providers and suppliers.
- To provide pivotal technical input on external and internal projects.
- To support their own project team to guarantee delivery of distinct and trackable objectives.
- Produce high quality projects plans, experimental strategies and technical reports.
- To report to and support the CTO.
- Contribute to and support multiple interdisciplinary projects and effectively interact with the other technical and R&D teams.
- Follow and produce detailed lab SOPs.
- Ability to maintain lab equipment as well as trouble shoot technical problems.
- Record results accurately in a Laboratory Book in accordance with Company policy & common
experimental & development protocols.

- Follow and implement strict safety procedures.
- Work within the Company’s Quality Systems and Policies in line with ISO 13485 standards.

**Experience, knowledge and requirements: Essential**

- Currently pursuing MS (Master of Science) or PhD in Biomedical Engineering or related scientific/engineering discipline.
- An in-depth understand of microbiology & engineering principles.
- An in-depth technical understanding of commercial and emerging IVD techniques.
- A minimum of 1-year relevant R&D experience.
- A track record of teamwork and coordination with other scientists and engineers.
- Meticulous record keeping and a willingness to learn new skills and techniques.
- Experience in working to very tight deadlines across multiple projects.
- Experience in managing multiple external partner relationships.
- Knowledge of safe laboratory practices.
- Excellent communication/IT skills and the ability to work in an ever-changing environment.
- Be eligible to work part time or full time in the USA without restriction.

**Desirable**

- Prior experience within a role entailing new product in the diagnostic industry.
- Prior industry-level experience in infectious disease diagnostics.
- An understanding of the molecular device market.
- A track-record of project leadership.
- Familiarity with global regulatory requirements that pertain to product development and IVD manufacturing (e.g. FDA, ISO etc).
About: Vessel converts geographically based lists, listicles, guides and recommendations into interactive maps. This conversion allows drives engagement and increases revenue for the content publisher.

AN INSANELY GREAT
Account Exec.

Reports To
The Account Exec will report to the CEO.

Job Overview
Vessel is a lean startup of creatives looking for a passionate Sales Executive to join our team. You will unite with a team of hard-working, do-whatever-it-takes, freakishly fun Vesselers, who all share the same obsession: our customers. Every fiber of our body is committed to building Vessel into the largest network of visual discovery content - ever!

We are a fresh, forward-thinking startup, providing innovation & monetization to a hyper-growth industry - and you will be joining during a significant period of our business.

Beware... we're hands-on at Vessel! We're humble, insanely focused and laziness isn't tolerated. You have to be willing to roll up your sleeves, work independently, innovate your position and remain confident under pressure.

Qualifications - Ninja-Like Skills.
Knowledge of the influencer marketing or blogging industry. You happen to be apart of a blogger alliance/group, or you possess a book of business and you’re excited to help them find new ways to innovate.
Knowledge or experience with social media marketing or possesses a content marketing background.
Up to date on social trends, metrics, and customary social media monetization tactics.
Experience with the Wordpress or Squarespace content management systems.
Ability to work with potential customers to optimize active and draft Vessel campaigns.
Maintains professional and technical knowledge by attending educational workshops; reviewing professional publications; establishing personal networks; participating in professional societies.
Simply put: you must be the coldest salesperson ever!

Culture Fit.
To get in you gotta fit in.

You’re able to communicate solutions clearly and consistently to customers and teammates. You help them understand complex things with ease — like why you park on a driveway and drive on a parkway.
You think big! Because you know that if it doesn’t rob of sleep them the heist isn’t big enough.
You taste it before you serve it. You research or implement preliminary tests to confirm your assumptions before presenting or shipping an idea.
You are extremely hard working. This company is growing fast. Hard work is rewarded and required.
You have an entrepreneurial mindset with a vicious internal drive and desire to set goals and succeed.
You realize the details don’t mean much... they mean EVERYTHING! You maintain a laser focus.
You are creatively minded and appreciate great design -- even if you suck at Photoshop.
AN INSANELY GREAT
Social Media Manager

Reports To
The Social Media Manager will work with the Vessel Content Creator and report to the CEO.

Job Overview
Vessel is a lean startup of creatives looking for a passionate Social Media Manager. You will unite with a team of hard-working, do-whatever-it-takes, freakishly fun Vesselers, who all share the same obsession: our customers. Every fiber of our body is committed to building Vessel into the largest network of visual discovery content - ever!

Your work on the Vessel Astronaut campaign will highlight Vessel superusers and the creative-gold behind their motivation to share breath-taking experiences as they explore the world. We are a fresh, forward-thinking startup, providing innovation & monetization to a hyper-growth industry - and you will be joining during a significant period of our business.

Beware... we're hands-on at Vessel! We're humble, insanely focused and laziness isn’t tolerated. You have to be willing to roll up your sleeves, work independently, innovate your position and remain confident under pressure.

Qualifications - Ninja-Like Skills.
- Experience managing social media content for consumer-facing brands (community manager, social media analyst/manager, or similar)
- Passion for social media and demonstrated initiative in researching/implementing new practices
- Fluency with social media channels including Facebook, Instagram, Twitter, Buffer or Hootsuite.
- Copywriting skill
- Currently enrolled in Marketing, Communications, Fine Arts, and PR, Journalism or related degree program.
- Knowledge of the influencer marketing or blogging industry.
- Solid project management skills, with the ability to multi-task and meet tight deadlines.
- Post, monitor and analyze posts and trends.
- Collect/research relevant info and content for posts.
- Maintains professional and technical knowledge by attending educational workshops; reviewing professional publications; establishing personal networks; participating in professional societies.
- Ability to be flexible and to adapt to last minute changes, comfortable with ambiguity.
- Simply put: you pretty much gotta be addicted to social media to enjoy this role.

Culture Fit.
To get in you gotta fit in.
- You’re able to communicate solutions clearly and consistently to customers and teammates. You help them understand complex things with ease — like why you park on a driveway and drive on a parkway.
- You think big! Because you know that if it doesn’t rob of sleep them the heist isn’t big enough.
