Fall 2020 BIC Alumni Track Seed Fund Application

Overview

The UT Dallas Seed Fund program aims to provide seed or “gap” funding to UT Dallas affiliated companies in an effort to accelerate their growth and prepare them for larger angel investment or venture capital investment. Furthermore, the program is carefully designed to provide an experiential learning opportunity for students by emulating a real-world investment environment. This is achieved by enabling entrepreneurially minded students to directly participate in the process leading to grants in high-potential startups by engaging in the due diligence and selection process. Grants made to UT Dallas students, faculty and alumni startups can range upwards of \$25,000 per company depending upon the needs, potential, and accomplishments of the business.

The Seed Fund Support course is an elective administered by the Innovation and Entrepreneurship Academic Program and aims to fund at least one startup per semester. Qualifying companies will have inventions, discoveries, products or services that have achieved proof of concept (or a prototype) and are deemed ready for commercial product development or deployment.

By submitting this application, I understand that the UT Dallas Seed Fund does not purchase securities or equity in my business and my decision to participate in the founder’s pledge program is strictly optional:

I understand (1)
